SUMMARY

Detail-oriented Full Stack Developer with 1 year of professional experience in designing and developing production-grade web applications. Proficient in building responsive front-end interfaces using React and developing robust back-end services with Node.js and Express. Hands-on experience with MongoDB and PostgreSQL, enabling efficient handling of diverse data requirements. Demonstrated ability to design scalable APIs, optimize database performance, and deliver reliable, high-quality software solutions. Committed to continuous learning and leveraging technology to drive meaningful impact.

SKILLS

- **Programming Languages:** C++, JavaScript
- **Frontend Development:** React
- **Backend Development:** Node.js, Express.js
- **Databases:** MongoDB, PostgreSQL
- **API Technologies:** REST APIs, GraphQL
- **Tools & Technologies:** Docker, Git, GitHub, VS Code

EXPERIENCE

Software Developer (Remote) , BlueBanyan Technology

May 2025 - Present

- Developed and maintained responsive front-end applications using React.
- Integrated REST APIs and GraphQL services to ensure seamless data flow between client and server.
- Implemented role-based access control (RBAC) to manage user permissions and enhance application security.
- Collaborated with cross-functional teams to deliver scalable and high-quality features.

EDUCATION

Bachelor of Engineering (Computer Science)

June 2020 -May 2024

Baderia Global Institute of Engineering and Management

CGPA 7.86/10

Class 12th

May 2019 – May 2020

New Era Public School

Percentage – 65.5%

Class 10th

New Era Public School

May 2017 – May 2018

Percentage – 60 %

PROJECTS

URL – Shortener

- Developed a full-stack URL shortener application using React, Node.js, and Express.js.
- Designed and managed the database using PostgreSQL with Drizzle ORM for efficient data handling.
- Implemented secure authentication and authorization using JSON Web Tokens (JWT) for user access control.
- Built and integrated RESTful APIs to handle URL generation, redirection, and analytics.
- Utilized Zod for schema validation to ensure data integrity and reliability.

Projexia – Project Management System

- Designed and developed a full-stack project management application using React, Node.js, and Express.js.
- Built a scalable RESTful API and integrated it with a responsive front-end interface.
- Implemented secure authentication and authorization using JWT with refresh tokens and email verification.
- Developed role-based access control (RBAC) with Admin, Project Admin, and Member roles.
- Created features for project, task, subtask, and note management with real-time status tracking.
- Integrated file upload functionality using Multer for task attachments.
- Applied input validation and security best practices to ensure robust and secure application performance.
